SUMMARY

Shipping since age 14 — a frontend engineer obsessed with how products feel, not just whether they work: motion, sound design, and micro-interactions ship even in pure business dashboards. Hired as Qi Card's youngest employee and its only frontend engineer for seven government platforms serving 4+ million users (Iraq's largest e-payment provider, 3,000+ employees); overhauled and redesigned every app within a year, then scouted, trained, and now lead its four-person frontend team. The platforms include Oil Coupon, Super Qi's most-used miniapp, serving 3+ million families. Founder of Vitex ("Software, pretty and perfect"), shipping its own products: an e-learning app with 25K+ downloads and an auction platform moving \$3M+ monthly. Open-source contributor to Reka UI and Hyprland.

EXPERIENCE

Lead Frontend Engineer — *Qi Card* Baghdad · full-time, on-site Jan 2025 – Present

- Youngest employee among Qi's 3,000+ staff.
- Hired as the sole frontend engineer for seven government platforms; rebuilt and redesigned every app to modern Vue/Nuxt standards within a year.
- Built the frontend team — scouted, interviewed, and trial-task-vetted all three hires, then trained and onboarded them; now lead the four, owning code review, standards, and release quality.
- Portfolio serves 4+ million users — including Oil Coupon, Super Qi's most-used miniapp (3+ million families), and the systems managing the state OPDC's oil-product distribution to gas stations, bakeries, generators, and farms nationwide.
- Designed and built the corporate website of Enjaz, Qi's e-government arm.

Director of AI & Technology — *Ishtar Center for Democracy Support* part-time Feb 2024 – Present

- Center member of an Iraqi NGO advancing democracy and human rights; own all of its technology.
- Work with Iraq's top researchers, applying advanced AI models to conduct and enhance the center's research.
- Built and operate ishtarcenter.com — a bilingual Nuxt site with a self-hosted backend — and the center's conference website.

Founder & Lead Engineer — *Vitex* Baghdad · self-employed Oct 2021 – Present

- Run a four-person design-engineering studio ("Software, pretty and perfect") building web platforms and mobile apps for Iraqi enterprises and NGOs.
- Built Risha end to end — mobile app, dashboard, website: e-learning connecting Iraq's sixth-preparatory students with elite private tutors. 25K+ downloads, custom cross-device DRM; led all design and frontend.
- Built and operate Auction Key, a car-auction brokerage platform with built-in ERP and white-label apps, powering Al-Nejoud Al-Zahera's operations — 1,000+ cars and \$3M+ in transactions monthly.
- Built and operate Rocca Menu, a multi-tenant QR-menu SaaS for restaurants, live in 20+ venues.
- Shipped platforms for Afaq Al-Obaidi subsidiaries — Smartic (employment), National Foodstuff, Auto Zone, Golden Lube — and an archiving system for the Al-Amal Association.
- Operate 20+ production client deployments (Cloudflare Pages + self-hosted VPS backends).

Senior Software Engineer — *Morshed* Baghdad · part-time, hybrid

Feb 2024 – Dec 2024

- Built Morshed’s website, accounting ERP, and internal workflow systems — and shipped websites and ERP systems for Morshed’s clients.
- Owned the digital transformation of the business-development & PR firm end to end.

Frontend Engineer — *Digital Logic* Baghdad · full-time, on-site

Oct 2022 – Dec 2024

- Built the **Iraqi Electronic Passport** platform’s public website and appointment-booking flow, plus Vue.js frontends for the General Company for Ports of Iraq and the Shipping Agencies systems.
- Led a team of nine developing The Garage System — an ERP managing the intercity-taxi garages of every Iraqi governorate; set code conventions and reviewed all frontend work.
- Mentored three interns through their first production features.

Design Engineer — *Speetu* Amsterdam · part-time, remote

Oct 2021 – Oct 2022

- Designed and built websites for Dutch brands — including Inflexio — plus Speetu’s own site, logo, and brand identity.
- Collaborated remotely with a distributed team across time zones.

Graphic Designer — *The Town Studio* full-time, on-site

Jun 2021 – Oct 2021

- Produced print and digital brand assets — brochures, posters, social-media sets, and web graphics — mostly for beauty and organic brands, doctors, and surgeons.
- Worked with marketing teams to keep design aligned with brand strategy and campaign goals.

Cashier & Store Assistant — *Nakhlat Baghdad* Baghdad · full-time, on-site

Apr 2019 – Jun 2021

- First job ever, in a mid-sized Al-Harithiya supermarket — checkout, inventory, and restocking, learning to handle impatient adults before having a high-school ID.

EDUCATION

BSc Computer Engineering — *Al-Turath University, Baghdad*

expected Aug 2027

Pursued alongside full-time engineering work — a deliberate choice of a private, attendance-flexible university so the career never had to slow down.

SKILLS

Core	TypeScript, Vue 3, Nuxt 4, Tailwind CSS, Nuxt UI, Pinia, Vite, Vitest
Broader stack	React / Next.js, Svelte, Node.js, Go, Firebase
